Quality Control Association  
for the Recycling of  
Refrigeration Units and  
Electrical/Electronic  
Equipment

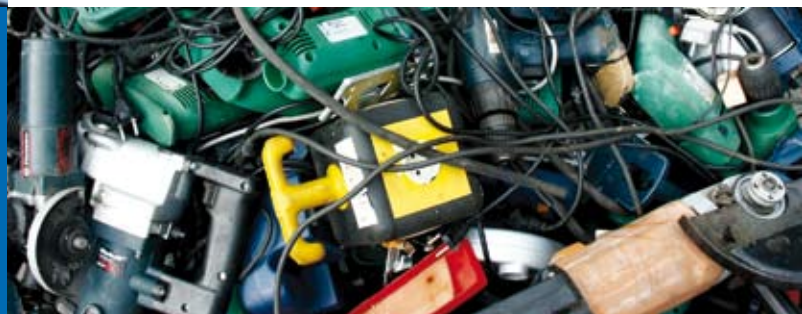

Qualitätsgemeinschaft  
zur Verwertung von  
Kühlgeräten und Elektro-/  
Elektronikgeräten e.V.

## QVKE: An association with great potential

The Quality Control Association for the Recycling of Refrigeration Units and Electrical/Electronic Equipment (QVKE) is a registered association that currently unites 35 predominantly medium-sized recycling companies, of which 29 are nationally and 6 internationally based.

QVKE has capacity to process and recycle approximately 4 million refrigeration units and 250,000 tonnes of discarded electrical/electronic equipment per year. Member companies currently generate a combined annual revenue of approximately EUR 100 million through recycling disused electrical equipment, not taking into account logistical and administrative services, and employ approximately 1.500 workers.

The Quality Control Association is a member of the German Association for Refrigeration and Air Conditioning Technologies (DKV).
